### Lightning Safety Awareness Week

SALT LAKE CITY—Governor Jon Huntsman, Jr. has declared June 18-24, 2006 as Lightning Safety Awareness Week in Utah, in conjunction with National Lightning Safety Awareness Week. The NOAA Lightning Safety Team, comprised of government and private sector businesses, will lead the lightning safety campaign, with participation from various state and local agencies and businesses.

During the past 30 years, lightning has killed an average of 67 people per year in the United States. This is more than the average of 65 deaths per year caused by tornadoes. In Utah, lightning has claimed the lives of 60 people since 1950, more than any other thunderstorm-related hazard. Because lightning usually claims only one or two victims at a time, and because lightning does not cause the mass destruction left in the wake of tornadoes or hurricanes, lightning generally receives much less attention than the more destructive weather-related killers.

During lightning safety awareness week, we hope you will learn more about lightning risks and how to protect yourself and your loved ones! Daily news releases and statements will be issued and broadcast on NOAA Weather Radio All Hazards during National Lightning Safety Awareness Week. Warning Coordination Meteorologists and Public Information Officers serving your community will be available for interviews and questions.

Daily topics still to come:

Tuesday – The Science of Lightning

Wednesday – Outdoor Lightning Safety

Thursday – Safe Shelters and Indoor Safety

Friday – Lightning and Wildfires
